◀ SBL-1100 Series Gantry

SBL-1100 Series, Hydraulic Gantry

Hydraulic Gantries

Hydraulic Gantries are a safe, efficient way to lift and position heavy loads in applications where traditional cranes will not fit and permanent overhead structures for job cranes are not an option.

Hydraulic Gantries are placed on skid tracks to provide a means for moving and placing heavy loads, many times with only one pick.

Enerpac offers three series of Hydraulic Gantry systems:

- The cost-effective SL-Series with best in class control and comparable capacity utilizing bare cylinders offered in 2 or 3 stages
- The heavy-duty SBL-Series with capacities up to 1,200 tons and 3-stage lifting capability through the boom structure
- The MBL-Series, which incorporates all features of the SBL-Series and offers full lifting capacity over the entire stroke

All Enerpac gantries are delivered with specific properties and control systems to ensure optimum stability and safety.
